

Effective and Durable Moisture Management Solutions for Exterior Walls and Roofs

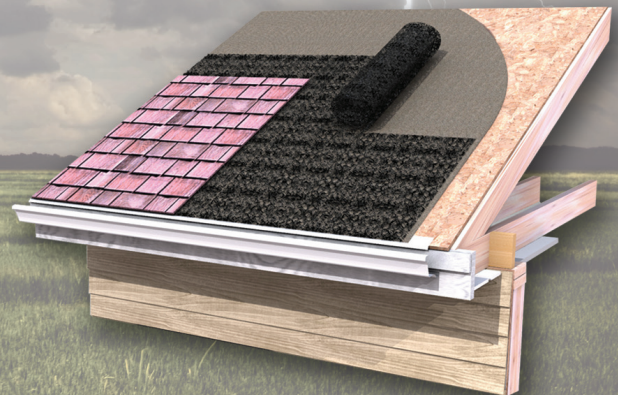

mortairvent[®]

Advanced Rainscreen Solutions

- Perfect for wood, stone, stucco, brick, or fiber cement siding.
- Creates a dedicated airspace behind siding for enhanced drainage and ventilation.
- Helps prevent mold growth and premature wall assembly deterioration.
- Fabric improves compressive strength and keeps mortar from blocking airspace when used with stucco or masonry veneer siding.

- Perfect for cedar, metal, or tile roofs.
- Creates a dedicated airspace below roofing for ventilation and drainage.
- Prolongs life of the roofing material and sub-structure.
- Maintains a thermal break between roofing and sheathing reducing heat build-up and transfer.
- Reduces sound transmission through panels.

For Permanent Moisture Protection, One Name Stands Out
